Applied Microbiology and Biotechnology

Founded as European Journal of Applied Microbiology in 1974 (Founding editor: H. J. Rehm). As of volume 5(1977) under the title European Journal of Applied Microbiology and Biotechnology. As of volume 19(1984) the title was changed to Applied Microbiology and Biotechnology.

Copyright

Submission of a manuscript implies: that the work described has not been published before (except in the form of an abstract or as part of a published lecture, review, or thesis); that it is not under consideration for publication elsewhere; that its publication has been approved by all coauthors, if any, as well as by the responsible authorities at the institute where the work has been carried out; that, if and when the manuscript is accepted for publication, the authors agree to automatic transfer of the copyright to the publisher; and that the manuscript will not be published elsewhere in any language without the consent of the copyright holders.
All articles published in this journal are protected by copyright, which covers the exclusive rights to reproduce and distribute the article (e.g., as offprints), as well as all translation rights. No material published in this journal may be reproduced photographically or stored on microfilm, in electronic data bases, video disks, etc., without first obtaining written permission from the publisher.
The use of general descriptive names, trade names, trademarks, etc., in this publication, even if not specifically identified, does not imply that these names are not protected by the relevant laws and regulations.
While the advice and information in this journal is believed to be true and accurate at the date of its going to press, neither the authors, the editors, nor the publisher can accept any legal responsibility for any errors or omissions that may be made. The publisher makes no warranty, express or implied, with respect to the material contained herein.

Special regulations for photocopies in the USA: Photocopies may be made for personal or in-house use beyond the limitations stipulated under Section 107 or 108 of the U.S. Copyright Law, provided a fee is paid. This fee is US $ 0.20 per page, or a minimum of US $ 1.00 if an article contains fewer than five pages. All fees should be paid to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA, stating the ISSN 0175-7598, the volume, and the first and last page numbers of each articles copied. The copyright owner's consent does not include copying for general distribution, promotion, new works, or resale. In these cases, specific written permission must first be obtained from the publisher.

Other regulations: Authors publishing in this journal can, under certain conditions, benefit from library and photocopy fees collected by VG WORT. Authors of German nationality and those resident in the Federal Republic of Germany or Berlin (West), as well as citizens of Austria, Switzerland and member countries of the European Community, may apply to Verwertungsgesellschaft WORT, Abteilung Wissenschaft, Goethestraße 49, D-8000 München 2, for detailed information.

Contents of volume 23

No. 1 (pp 1–84) published November 1985
No. 2 (pp 85–156) published December 1985
No. 3/4 (pp 157-310) published January 1986
No. 5 (pp 311–412) published February 1986

Biotechnology

Afschar AS, Schaller K, Schügerl K: Continuous production of acetone and butanol with shear-activated *Clostridium acetobutylicum* 315

Andel JG van, Zoutberg GR, Crabbendam PM, Breure AM: Glucose fermentation by *Clostridium butyricum* grown under a self generated gas atmosphere in chemostat culture 21

Bailliez C, Largeau C, Casadevall E: Growth and hydrocarbon production of *Botryococcus braunii* immobilized in calcium alginate gel 99

Bailliez C, Largeau C, Berkaloff C, Casadevall E: Immobilization of *Botryococcus braunii* in alginate: influence on chlorophyll content, photosynthetic activity and degeneration during batch cultures 361

Bisping B, Rehm HJ: Glycerol production by cells of *Saccharomyces cerevisiae* immobilized in sintered glass 174

Brown SW, Meyer H-P, Fiechter A: Continuous production of human leukocyte interferon with *Escherichia coli* and continuous cell lysis in a two stage chemostat 5

Cabral JMS, Novais JM, Kennedy JF: Immobilization studies of whole microbial cells on transition metal activated inorganic supports 157

Chapelle F, Steiman R, Seigle-Murandi F, Luu-Duc C: 5-Hydroxylation of benzimidazole by micromycetes. I. Strains selection 430

Cheung IH-S, Gishen M, Ghosh P, Pamment NB: Continuous ethanol production in an immobilized whole cell fermenter using untreated sugar cane bagasse as carrier 413

Fabregas J, Herrero C: Marine microalgae as a potential source of single cell protein (SCP) 110

Felten P von, Zürrer H, Bachofen R: Production of molecular hydrogen with immobilized cells of *Rhodospirillum rubrum* 15

Furuhashi K, Shintani M, Takagi M: Effects of solvents on the production of epoxides by *Nocardia corallina* B-276 218

Gosmann B, Rehm HJ: Oxygen uptake of microorganisms entrapped in Ca-alginate 163

Häggström L: Kinetics of product formation in batch and continuous culture of *Clostridium barkeri* 187

Holst O, Hansson L, Berg AC, Mattiasson B: Continuous culture with complete cell recycle to obtain high cell densities in product inhibited cultures; cultivation of *Streptococcus lactis* for production of superoxide dismutase 10

Hours RA, Massucco AE, Ertola RJ: Microbial biomass product from apple pomace in batch and fed batch cultures 33

Inloes DS, Michaels AS, Robertson CR, Matin A: Ethanol production by nitrogen-deficient yeast cells immobilized in a hollow-fiber membrane bioreactor 85

Jernejc K, Cimerman A, Perdih A: Comparison of different methods for protein determination in *Aspergillus niger* mycelium 445

Jokela J, Pellinen J, Salkinoja-Salonen M, Brunow G: Biodegradation of two tetrameric lignin model compounds by a mixed bacterial culture 38

Ju N, Wang SS: Continuous production of itaconic acid by *Aspergillus terreus* immobilized in a porous disk bioreactor 311

Kato N, Kobayashi H, Shimao M, Sakazawa C: Dihydroxyacetone production from methanol by a dihydroacetone kinase deficient mutant of *Hansenula polymorpha* 180

Komel R, Rozman D, Puc A, Sočič H: Effect of immobilization on the stability of *Claviceps purpurea* protoplasts 106

Legmann R, Margalith P: Ethanol formation by hybrid yeasts 198

Lovitt RW, Walter RP, Morris JG, Kell DB: Conductimetric assessment of the biomass content in suspensions of immobilised (gel-entrapped) microorganisms 168

Maddox IS, Hossain M, Brooks JD: The effect of methanol on citric acid production from galactose by *Aspergillus niger* 203

Marchal R, Blanchet D, Vandecasteele JP: Industrial optimization of acetone-butanol fermentation: a study of the utilization of Jerusalem artichokes 92

Muderhwa JM, Ratomahenina R, Pina M, Graille J, Galzy P: Purification and properties of the lipases from *Rhodotorula pilimanae* Hedrick and Burke 348

Nakajima R, Imanaka T, Aiba S: Comparison of amino acid sequences of eleven different α-amylases 355

Pacaud S, Loubière P, Goma G, Lindley ND: Organic acid production during methylotrophic growth of *Eubacterium limosum* B 2: displacement towards increased butyric acid yields by supplementing with acetate 330

Pagageorgiou GC, Lagoyanni T: Immobilization of photosynthetically active cyanobacteria in glutaraldehyde-cross-linked albumin matrix 417

Preez JC du, Bosch M, Prior BA: The fermentation of hexose and pentose sugars by *Candida shehatae* and *Pichia stipitis* 228

Qureshi N, Tamhane DV: Mead production by continuous series reactors using immobilized yeast cells 438

Scheper Th, Schügerl K: Culture fluorescence studies on aerobic continuous cultures of *Saccharomyces cerevisiae* 440

Sonnleitner B, Fiechter A: Application of immobilized cells of *Thermoanaerobium brockii* for stereoselective reductions of oxo-acid esters 424

Spassov G, Abraham WR, Kieslich K, Vlahov R, Krikozian D, Parushev St, Chinova M, Snatzke G: Microbial transformations of galanthamin-precursors 206

Spassov G, Abraham WR, Kieslich K, Schmidhammer H, Brossi A, Snatzke G, Vlahov R: Microbial transformation of 3-desoxy-dihydromorphinanes 211

Spieler H, Alfermann AW, Reinhard E: Biotransformation of β-methyldigitoxin by cell cultures of *Digitalis lanata* in airlift and stirred tank reactors 1

Spinnler HE, Lavigne B, Blachere H: Pectinolytic activity of *Clostridium thermocellum:* Its use for anaerobic fermentation of sugar beet pulp 434

Stumpf B, Abraham WR, Kieslich K: Microbial transformations of N-(4-chlorphenyl)-benzoisothiazolone 215

Suzuki T, Yamane T, Shimizu S: Mass production of poly-β-hydroxybutyric acid by fully automatic fed-batch culture of methylotroph 322

Tan KH, Gill CO: Effect of culture conditions on batch growth of *Pseudomonas fluorescens* on olive oil 27
Taya M, Aoki N, Kobayashi T: Kinetic evaluation and monitoring of methanogen culture based upon fluorometry 342
Toldrá F, Flors A, Lequerica JL, Vallés S: Fluidized bed biomethanation of acetic acid 336
Tran AV, Chambers RP: Lignin and extractives derived inhibitors in the 2,3-butanediol fermentation of mannose-rich prehydrolysates 191
Vitale Lj, Renko M, Lenarčič B, Turk V, Pokorny M: *Streptomyces rimosus* extracellular proteases. 3. Isolation and characterization of leucine aminopeptidase 449
Wright SJ, Caunt P, Carter D, Baker PB: Microbial oxidation of alpha-pinene by *Serratia marcescens* 224

Applied Microbiology

Best GR, Britz MB: Facilitated protoplasting in certain auxotrophic mutants of *Corynebacterium glutamicum* 288
Beyer M, Diekmann H: The chitinase system of *Streptomyces* sp. ATCC 11238 and its significance for fungal cell wall degradation 140
Breure AM, Beeftink HH, Verkuijlen J, van Andel JG: Acidogenic fermentation of protein/carbohydrate mixtures by bacterial populations adapted to one of the substrates in anaerobic chemostat cultures 245
Bringer-Meyer S, Scollar M, Sahm H: *Zymomonas mobilis* mutants blocked in fructose utilization 134
Bröker M, Amann E: pUC12-STOP: An expression vector with portable translation stop signals 294
Eriksson K-E, Pettersson B, Volc J, Musilek V: Formation and partial characterization of glucose-2-oxidase, a H_2O_2 producing enzyme in *Phanerochaete chrysosporium* 257
Ermakova IT, Shishkanova NV, Melnikova OF, Finogenova TV: Properties of *Candida lipolytica* mutants with the modified glyoxylate cycle and their ability to produce citric and isocitric acid. I. Physiological, biochemical and cytological characteristics of mutants grown on glucose or hexadecane 372
Finogenova TV, Shishkanova NV, Ermakova IT, Kataeva IA: Properties of *Candida lipolytica* mutants with the modified glyoxylate cycle and their ability to produce citric and isocitric acid. II. Synthesis of citric and isocitric acid by *C. lipolytica* mutants and peculiarities of their enzyme systems 378
Häggström L, Förberg C: Significance of an extracellular polymer for the energy metabolism in *Clostridium acetobutylicum:* A hypothesis 234
Hartmanis MGN, Åhlman H, Gatenbeck S: Stability of solvent formation in *Clostridium acetobutylicum* during repeated subculturing 369
Hussain T, Salhi O, Lematre J, Charpentier C, Bonaly R: Comparative studies of flocculation and deflocculation of *Saccharomyces uvarum* and *Kluyveromyces bulgaricus* 269
Kock JLF, Cottrell M, Lategan PM: A rapid method to differentiate between five species of the genus *Saccharomyces* 499
Krallish IL, Damberga BE, Beker MJ: The effect of yeast dehydration on the activity of a number of enzymes of cell energetic metabolism 482
Kück U, Neuhaus H: Universal genetic code evidenced in mitochondria of *Chlamydomonas reinhardii* 462
Kusch J, Rehm HJ: Regulation aspects of roquefortine production by free and Ca-alginate immobilized mycelia of *Penicillium roqueforti* 394
Lacoursiere A, Thompson BG, Kole MM, Ward D, Gerson DF: Effects of carbon dioxide concentration on anaerobic fermentations of *Escherichia coli* 404
Leak DJ, Dalton H: Growth yields of methanotrophs. 1. Effect of copper on the energetics of methane oxidation 470
Leak DJ, Dalton H: Growth yields of methanotrophs. 2. A theoretical analysis 477
Leão C, van Uden N: Transport of lactate and other short-chain monocarboxylates in the yeast *Candida utilis* 389
Lindley ND, Heydeman MT: The uptake of *n*-alkanes from alkane mixtures during growth of the hydrocarbon-utilizing fungus *Cladosporium resinae* 384
Luczak H, Schwarzmoser H, Staudenbauer WL: Construction of *Clostridium butyricum* hybrid plasmids and transfer to *Bacillus subtilis* 114
Lucas C, van Uden N: Transport of hemicellulose monomers in the xylose-fermenting yeast *Candida shehatae* 491
Lübbe C, Wolfe S, Demain AL: Isopenicillin N epimerase activity in a high cephalosporin-producing strain of *Cephalosporium acremonium* 367
Middelhoven WJ, Muylwijk CM: High-affinity amylolytic enzymes produced by the mould *Trichoderma harzianum* 400
Merivuori H, Sands JA, Montenecourt BS: Effects of tunicamycin on secretion and enzymatic activities of cellulase from *Trichoderma reesei* 60
Nishimura N, Kisumi M: Control of histidase formation and improvement of urocanic acid production in *Serratia marcescens* 54
Oeser B, Tudzynski P, Esser K: Extrachromosomal genetics of *Cephalosporium acremonium.* III. Characterization of a mitochondrial ars 280
Ohmiya K, Takeuchi M, Chen W, Shimizu S, Kawakami H: Anaerobic reduction of ferulic acid to dihydroferulic acid by *Wolinella succinogenes* from cow rumen 274
Poutanen K, Puls J, Linko M: The hydrolysis of steamed birchwood hemicellulose by enzymes produced by *Trichoderma reesei* and *Aspergillus awamori* 487
Sandler N, Zomper R, Keynan A, Margalit J: A study of the *Bacillus thuringiensis* var. *israelensis* crystal hemolysis as a possible basis for an assay of larval toxicity 47
Takagi A, Chua EN, Boonchird C, Harashima S, Oshima Y: Constant copy numbers of plasmids in *Saccharomyces cerevisiae* hosts with different ploidies 123
Tanaka M, Nakamura H, Taniguchi M, Morita T, Matsuno R, Kamikubo T: Elucidation of adsorption processes of cellulases during hydrolysis of crystalline cellulose 263
Vehmaanperä JO, Korhola MP: Stability of the recombinant plasmid carrying the *Bacillus amyloliquefaciens* α-amylase gene in *B. subtilis* 456
Viikari L, Gisler R: By-products in the fermentation of sucrose by different *Zymomonas*-strains 240
Vuillet S, Spinnler HE, Blachere H: Analysis of amino acid requirements of *Clostridium thermocellum* 496
Yamashita I, Itoh T, Fukui S: Cloning and expression of the *Saccharomycopsis fibuligera* glucoamylase gene in *Saccharomyces cerevisiae* 130
Yoshimura K, Miyazaki T, Nakahama K, Kikuchi M: *Bacillus subtilis* secretes a foreign protein by the signal sequence of *Bacillus amyloliquefaciens* neutral protease 250

Environmental Microbiology

Bolliger R, Zürrer H, Bachofen R: Photoproduction of molecular hydrogen from waste water of a sugar refinery by photosynthetic bacteria 147
Galiotou-Panayotou M, Macris BJ: Degradation of condensed tannins by *Calvatia gigantea* 502
Hours RA, Massucco A: A simple device for controlled feeding of pasty materials used as fermentation substrates 75
Lohmann E, Hagedorn H: The effect of parathion on green algae. II. The effect on photosynthesis 507
Mattei G, Rambeloarisoa E, Giusti G, Rontani JF, Bertrand JC: Fermentation procedure of a crude oil in continuous culture on seawater 302
Neilson AH, Allard A-S: Acetylene reduction (N_2-fixation) by Enterobacteriaceae isolated from industrial wastewaters and biological treatment systems 67
Sandvik S, Lode A, Pedersen TA: Biodegradation of oily sludge in Norwegian soils 297
Shuttleworth WA, Seal KJ: A rapid technique for evaluating the biodeterioration potential of polyurethane elastomers 407
Trevors JT: The influence of oxygen concentrations on denitrification in soil 152

Rapid communication

Geis A, Bockelmann W, Teuber M: Simultaneous extraction and purification of a cell wall-associated peptidase and β-casein specific protease from *Streptococcus cremoris* AC1 79
Mahmoud W, Rehm HJ: Morphological examination of immobilized *Streptomyces aureofaciens* during chlortetracycline fermentation 305
Uraih N, Izuagbe YS, Ivbievbiokun P: Production of synthetic palm wine 77
